

Mines and Mining Stocks

KING DAVID IS DOWN TO WORK

Shaft and Tunnel Driving Now Under Way Close to Horn Silver Mine.

The real campaign of development on the King David company's property, in Beaver county, has commenced. The grading for the hoisting works and other buildings has been completed and sinking has commenced in the shaft that is to go down within a few hundred feet of the developed ore bodies in the famous Horn Silver mine and which have recently been shown to trend toward the possessions of the King David company. At the same time a tunnel designed to cross-cut the fissure system has been started from a point not far distant from the shaft and this will materially aid in disclosing the ore bodies as they make back into King David ground.

COPPER STOCKS IN BOSTON AND NEW YORK

Following is the daily market comment of Faine, Webster & Co., Boston, together with the range of prices of copper stocks and other Boston listings in which the west is interested, as well as a similar report on New York curb transactions, by James A. Pollock & Co., and from which it is secured for use in this department of The Herald.

Boston, Sept. 19.—The Bryan scare is developing and traders are selling the whole list. The attack today was concentrated on the copper stocks, the big interests being willing to let prices off. However, this short selling is only putting the market in a stronger position, which has no hesitation in advising the purchase of good stocks on any further reaction. We expect to see a good rally Monday if Bryan does not make some startling speeches in Connecticut tonight.

SIoux CON. IS MINING RICHER ORE THAN AT FIRST

Some splendid ore is being sent out from the Sioux Consolidated mine these days, says the Eureka Reporter. The output for the present week will be three or four carloads, and some of this ore is exceptionally rich in silver and lead. The third carload, which was being loaded at the time the Reporter was published last week, carried 71 ounces silver and a little better than 50 per cent lead, and the two carloads which followed this lot to the smelter will, it is understood, carry even higher values in silver. Yesterday a general assay taken from the best face of ore which is now exposed in the mine showed 178 ounces in silver and about 50 per cent lead.

The Sioux ore body, like that of the Colorado, is richest near the top. The Sioux management is working the ore from below, and when the first carload went to the smelter it carried but 35 ounces in silver, but as the work progressed the ore kept getting richer and richer. As the time the first carload was taken from the top of the ore some sensational silver values are expected.

MINING STOCK EXCHANGE.

Unsettled Conditions and Weakness Feature of Week's Trading.

All eastern market reports attribute present slump conditions to what the writers are pleased to call "the Bryan scare." While the west shows no symptoms of being "scared" over either Bryan or Taft's prospects of election, it is evident that the slumpy and unsettled condition of the eastern markets is having its effect here. It is argued here that, if the east is bent on precipitating a "scare" it is just as well to apply the brakes until things settle down, and that is making the local market weak and unsteady. There was good buying yesterday in some of the stocks and the prospects for a good day Monday looked bright at the close. All of the news that comes from the mining camps is of a most assuring and encouraging nature, and every market follower in this region capable of playing the game is of a most assuring and encouraging nature, and every market follower of the bargains that the weak market offers, knowing full well that a turn must come sooner or later, no matter how the presidential election goes.

During the week a total of 490,000 shares of stock, with a selling value of \$37,414,000, changed hands, yesterday's proportion of the totals being 35,400 shares and \$2,616,000. Following is the list of final quotations of the week's trading, as made during yesterday's session of the exchange:
